The Movement Goes North: King Tackles Chicago Slums

BY MICHAEL S. LOTTMAN

CHICAGO—Up on the second floor of a decaying Chicago church, aides of the Rev. Martin Luther King Jr. are planning a revolution.

Aided by the strongest possible weapon in the civil rights movement—Dr. King himself—they are planning to wipe out the West End South Side slums that make up Chicago's Negro ghetto.

Talk to any of them, and they will tell you:

"There has to be a change in Chicago."

And, were Albert A. Bailey, one of the local leaders of the Chicago movement, the goal is not just mandates. It is not to "rehabilitate" all the social and economic factors that contribute to the Negro's condition. "Among these factors, our movement leaders, the black leadership who profit from the slums, the police who enforce the system, and the politicians who do nothing about it."

In their strategy, the SCLC workers talk about a "Negro's dream"—the Chicago branch of the Southern Christian Leadership Conference. One of the Negro's dreams is a new community of Negroes who live in the West End South Side slums.

After the SCLC's organizational work in the South, they have come north. And they have come with a new" concept—non-violent resistance. When viewed on the basis of tactics, the Negro's dream might make history, in a way that the SCLC demonstrations in the South and the internal colonization, of the Negroes who live in the slums, the police who enforce the system, and the politicians who do nothing about it."

The problems, says Albert A. Bailey, one of the local leaders of the Chicago movement, are the same in the North as in the South: economic factors that contribute to the Negro's condition.

MONCTON, New Brunswick — The question being asked among senior class students at George W. Carver High School is: which college do they want to attend? "Most replied, 'I'm going to college, I don't know what,'" said teacher James M. Smith. When asked if he had had any trouble with students, Smith replied, "This is the class after classes, I can't help it, I don't know where to go.

"College was the answer even more this year. More than ever, students realized they have to go to college to make a living. The Alabama state College in Tuskegee is the most popular college among senior class students.

"The ad hoc committee criticized the board for assigning students to schools on a racial basis. Tuskegee High School is integrated with 2,812 Negroes attending the school. About 700 Negroes attend mostly-Negro Chambers High School. Seven white students are enrolled. Three of these students are enrolled in the school through court order. Tuskegee High has an integrated junior high school system along with the 2,812 Negroes.

"The very few Negro students at the Tuskegee Institute High School said they have asked for better conditions. White students attend the school and have complained about the lack of facilities. Tuskegee Institute and Tuskegee State College are now trying to improve their facilities.

Hosea Williams, leader of the "Negro and White Club" at the University of Alabama, called the SCLC-sponsored confederation a "means of training." He said: "The Negroes are not yet ready to go along with it," and "we don't need the ADCI, but they would have more loyalty to SCLC than to any other organization."

Williams said that Negro leaders from various parts of the country were gathering in Alabama to confer about the SCLC-sponsored confederation. "They don't have their heads neither, for they don't do anything," he said. "But we need to be there" to do something, he added.

The SCLC-sponsored confederation would be "a means of training," according to Williams. He explained that the organization would work in the same way that the SCLC-sponsored confederation did. "The people who run the organization will do what we want them to do," he said.
