The federal government, recognizing that starvation isn't good for people, has set up two programs to provide food for poor families. Under one of these programs, surplus food—rice, meat, milk, canned and dry beans, etc.—is given away free. Under the other program, families with no income get food stamps every two weeks. This means that the poorest people—the ones who are generally friendly and cooperation—and effective way of filling empty stomachs. But the other one involves the sale of food stamps, is a snare and a delusion.

The main difference between the two programs is the way the food is given. One is given away free. But every family, no matter how poor, has to scrape up $4 to get stamps. The food stamps might be a little as $6 or as much as $400 worth of stamps—which is an advantage for greedy landlords and others, too.
